

Prometheus Laboratories Inc. is a specialty pharmaceutical company committed to developing new ways to help physicians individualize patient care. The company's revolutionary approach is engineered to assist physicians with rapid diagnosis and optimal treatment, which ultimately strengthens relationships between doctors and patients.

Prometheus focuses on the treatment, diagnosis and detection of gastrointestinal, autoimmune and inflammatory diseases and disorders. Its strategy includes the marketing and delivery of pharmaceutical products complemented by its proprietary, high-value diagnostic testing services. By integrating therapeutics and diagnostic services, Prometheus addresses the continuum of patient care, thereby providing physicians with a comprehensive solution to treat chronic diseases.

For both Prometheus and Grubb & Ellis|BRE Commercial (G&E|BRE), it's about relationships. When Prometheus undertook a competitive selection process to choose a real estate firm to represent it on its lease acquisition, the decision to work with G&E|BRE "came back to relationships," said Joseph M. Limber, Prometheus President and Chief Executive Officer, one that had started years ago when the two firms first worked together. During negotiations, the relationship that brokers Glenn Arnold and Dave Odmark had with the building owner greatly aided in bringing the parties together on key issues and helped secure the lease for Prometheus' new 99,000-square-foot location. "Grubb & Ellis|BRE Commercial provided excellent market intelligence, which allowed us to leverage our negotiating position to its fullest," Limber said.
